PROFESSIONAL SUMMARY

AI/ML Engineer with 3.5+ years of experience building production AI products across client engagements and internal product teams. Strong in LLM and RAG systems, Python backend engineering, React-based product delivery, AWS deployments, and translating ambiguous business problems into shipped software.

EXPERIENCE

Machine Learning Engineer | Codersarts

Apr 2023 - Present

AI products, client delivery, deployment ownership

- Built and shipped AI products using LLMs, RAG pipelines, semantic retrieval, Django, Flask, React.js, and AWS cloud infrastructure.
- Sole developer for Nova, a client AI email automation system using Django, Flask, React.js, LLMs, and RAG; owned production maintenance and AWS deployment.
- Lead backend engineer for Compelion, building and maintaining Django DRF APIs and AWS infrastructure for an AI-powered innovation management platform.
- Delivered CloudNotes production infrastructure with ECS and Fargate autoscaling, S3 and CloudFront frontend delivery, and GitHub Actions CI/CD.
- Developed internal Codersarts products including Candidate Hub and Agents (CaaS), focused on semantic candidate matching and agentic business automation.
- Built pSEO automation engines across Quizentia, Candidate Hub, Agents, and Compelion, generating 1,000+ pages with more than 60% unique AI-assisted content.
- Acted as product lead for Quizentia, aligning engineering with leadership priorities and then owning deployment to production.
- Served as primary technical contact for 20+ clients across discovery, demos, delivery, and production rollout conversations.

Machine Learning Engineer Intern | Codersarts

Oct 2022 - Mar 2023

Research prototypes and ML foundations

- Developed machine learning and computer vision models using TensorFlow and PyTorch.
- Built NLP pipelines for classification and sentiment analysis.
- Contributed to research prototypes in vision and deep learning.

SELECTED PRODUCT LEADERSHIP

Nova | Client Project

Sole developer for an AI-powered email automation system using LLMs and RAG; built the Django and Flask backend, React.js frontend, and AWS deployment.

Compelion | Client Project

Lead backend engineer for an AI-powered innovation management platform built on Django DRF with AWS-backed cloud infrastructure.

CloudNotes | Client Project

CORE SKILLS

- **AI Systems:** LLMs, RAG, semantic retrieval, prompt workflows, LangChain, vector databases
- **Backend:** Python, Django, Django DRF, FastAPI, Flask, REST APIs, PostgreSQL
- **Frontend:** React.js, JavaScript, product-facing UI delivery
- **Cloud:** AWS ECS, Fargate, EC2, S3, CloudFront, ALB, Docker, GitHub Actions CI/CD

Delivered autoscaling production infrastructure using ECS, Fargate, S3, CloudFront, and GitHub Actions CI/CD.

Candidate Hub | Internal Product

Developed semantic resume and JD matching focused on engineering depth rather than keyword-only filtering.

Agents (CaaS) | Internal Product

Built a reusable chatbot and agentic automation platform for business workflows and multi-industry use cases.

Quizientia and DocProcessing360 | Internal Products

Acted as product lead and deployment owner for Quizientia, and supported production rollout for DocProcessing360 document intelligence workflows.

- **Delivery:** 0-to-1 builds, client discovery, demos, deployment ownership, pSEO automation, mentoring

EDUCATION

M.Tech, Digital Manufacturing

SASTRA University | 2020 - 2022 | CGPA: 8.76

B.Tech, Mechanical Engineering

SRM Institute of Science and Technology | 2015 - 2019 | CGPA: 6.96

SELECTED CERTIFICATIONS

- MLOps Specialization, DeepLearning.AI
- IBM Full Stack Software Developer
- Docker, Kubernetes and OpenShift
- Microservices and Serverless Development
